Prospectors and "New Camp" Outfits Start for Gold Country.

INDICATIONS GROW MORE ENCOURAGING

Salt Lake Interests in One Opex, the young unlisted which per-formd on Wednesday to the bewilder-Twin Falls Company.

Special to The Tribune. TWIN FALLS, Ida., Jan. 13.-C. G. Winter came in from Jarbidge mining of 95 cents, advanced during the camp, 100 miles to the southwest of this city, tonight, having made the journey movement, it is looked to to maintain a in two days, and brought most enthusi-astic reports of the conditions in this astle reports of the conditions in this astle reports of the conditions in this newly-found gold region. He said that despite the extreme cold prevailing in the camp as well as along the route, he passed twenty-two men pushing through the snowdrifts over the trail, and that freight for the district is pilled up high at the Wilkins ranch, sixteen miles east of the camp where transfers have to be made from wagons to pack trains. The operations in the camp were suspended but a few days after the first of the year, Winter explained, "hecause of the big snowstorm, but as soon as the snow packed sufficiently the prospectors were going over the hills again, and making locations has been among the principal work. There are some of the properties, however, on which the development work is proceeding with splendid results in every instance, and everybody in the district now admits that it is not a question as to whether the camp 'makes good' or not, but now great it is going to be." On Ground Early.

Winter owns a ranch within ten miles of the recently-discovered bonanzas, together with his brother, and was among the first to respond to the announcement that Bourne had at last located the seat of the gold deposits which had been furnishing for many years the placer gold channaling from the region, and enjoys the reputation in northern Nevada, as well as in southern idaho, of boing absolutely a reliable man and inclined to be extremely conservative on mining inatters; and he declares that the camp is positively the biggest thing ever found in the history of American gold discoveries. On Ground Early.

in the history of American gold discoveries.

Winters has secured a number of options on various properties within the last three weeks, since he was here, and he has organized the Twin Falls-Jarbidge Mining and Development company, composed of some of the principal business men of this city. He purchased for this city the purchased for this corporation during this trip into the discrete the Escallon group of claims, for \$250,000, its showings being regarded as better even than those of the Bourne group. The property shows a dyte that stands high above the surface similar to the Bourne property, pannings from which show much gold to the naked eye, in addition to the tellurium sands, on which assays only will disclose the true values.

Will Prosecute Work.

Among the stockholders in the Twin Falls.

Will Prosecute Work.

Among the stockholders in the Twin Falls-Jarbidge Mining and Development company are Frank Kimball of Salt Lake, C. J. Hahn, C. T. Booth, Attorney W. P. Guthrie, Dr. Boyd, J. W. Craven and Sheriff J. C. Dyer. The company members, immediately upon learning of the acquirement of the Escallons, decided to prepare to develop the ground at once, and it is believed that a very little development will furnish much high-grade ore that can be shipped to the Salt Lake smelters. Milder weather which began here today occasioned the departure of several crowds of prospectors who have been anxiously waiting here for a more moderate temperature before undertaking the journey. Included in these caravians were restaurant and rooming-house outfils, assayers, stocks of merchandise, and expectally supplies of mining tools of which the district has been in much need.

Twin Falls is becoming more and more excited every day over the news which

Twin Falls is becoming more and more Schwab - Seven Tree excited every day over the news which Sil King is coming from the district in private Sil King letters to friends of parties who are on Sioux Comments of the comment

A Sprained Ankle.

As a rule a man will feel well satis-Tin Humb fied if he can hobble around on crutches . in two or three weeks after spraining it is often two or three months before he is fully recovered. This is an unnecessary loss of time, as Victor Con by applying Chamberlain's Liniment, as W Nev C directed, a cure may as a rule be effeeted in less than one week's time, and in many cases within three days. Cham-· berlain's Liniment also affords great relief in cases of chronic and muscular at \$1.02\frac{1}{2}; 1100 at \$1.05; 600 at \$1.02\frac{1}{2}, seller sixty days.

ment Has Been Contemplated.

President J. C. Dick of the Majestic The general tone of the market at Thursday's trading was encouraging. Thursday's trading was encouraging. Mining company, operating the Harring-ton-Hickory mines in Beaver county, was recently in consultation in New York City the trading. Tintic Central, around with F. A. Heinze and George Baglin. which considerable excitement centered treasurer of the Miners' Smelting comtive and closed with sales at 9 cents. jestic smelter in Beaver, and upon Mr. Dick's return to Boston it was intimated Dick's return to Boston it was intimated that this smelter may soon be put in commission again. Since work was resumed at the Harrington-Hickery, following the installation of pumping machinery and other working equipment, splendid progress has been made in the development work and it is stated that ore has been blocked out in sufficient quantities to convince the management that in the near future the commissioning of the smelter will be warranted. Regarding the recent reports of the flooding of the Harrington-Hickory, the enforced suspension of work and the probability of a near assessment, which ganied some circulation in the east, President Dick stated that there was absolutely no truth in the rumors, and that all operations are going along in a very satisfactory manner. The pump, it is stated, has to be run eighteen minutes in every twenty-four hours to handle all of the water which makes in the mine, and no future trouble on account of excessive water is anticipated. ment of the traders, was also down a few pegs and the stock seemed to be more loosely held, sales being made at movement, it is looked to to maintain a position well above the dollar mark for some time to come. *Colorado, Sioux Consolidated and Iron Blossom have apvesting public, and sales in these se-curities these days are light and at bed-rock prices. Closing quotations and sales for Thurs-day follow:

Plenty of Cash.

While in New York Mr. Dick received the second payment on the lease held on the Majestic smelter by the Miners' Smelting company, and it is announced that the Majestic company still has ample funds on hand to continue development work for many months to come. The directors of the company, it is said, have never even considered the proposition of levying an assessment, and it is stated also that it will not be necessary for them to take such action, so far as present conditions indicate. Plenty of Cash.

MASON VALLEY IS MINE OF WORTH

T. L. Waiden, for a number of years connected with the Silver King Coalition company in the mining industry in the Park City district, and later a successful operator in Nevada camps, is visiting in Salt Lake for a few days. Mr. Walden is at present located at Yerington, and is particularly optimistic on the conditions existing at the present time at the Mason Valley property. In his opinion, the real worth of this mine is not realized by the public generally, recent developments in the driving of the upraises driven primarily for the purpose of ventilation having been of an especially encouraging nature, in that the extent of the ore deposits of the property were proven up so extensively. Mr. Walden is satisfied that the report of Engineer Labarthe, the Granby expert, who recently made an examination of Mason Valley for the purpose of determining the smelting possibilities of its ores, is going to be most faverable, and that the construction of a smelter for the company will be well under way in a comparatively short time.

The near approach of the railroad, Mr. Walden says, has also had the effect of livening things up generally in the Yerlington country. .011

WILSON PLEASED WITH DEEP CREEK

Frank L. Wilson has returned from a visit of inspection to his various holdings in the Deep Creek country, and reperts that conditious generally in that section are very encouraging, the new year having started off with a large amount of development work under way. On the Gray Eagle group, ore averaging \$75 per ton has been found, the gold running about \$18, and the bismuth percentages in the ores being an especially encouraging feature. On the Tin Cup claims a fifteen-foot vein of good copper ore is being followed, and at the Iron Duke, also, good copper values are showing in the ores.

ANOTHER COMPANY FOR OPHIR CAMP

Stocks Fail to Attract More President Denies That Assess- Mercur Mining Men Secure Big Body of First Class Year Promises to Be Record Lease on Old Worthing Group.

Advices from Mercur are to the effect that James Sloan and James H. Smith of that camp have been successful in rounding out a deal whereby they secure a lease and hond on the old Worthing group of five claims in the Ophir mining district. The lease runs for a period of two years, with the privileges of purchase at the end of that time.

The Worthing group is considered by mining men familiar with the district to be one of the most promising undeveloped properties in that section. All of the mineralized fissures, which cut through the properties of the Buckhorn, Ophir Hill and Dry Canyon companies, and have been developed to good advantage in those claims run also through the Worthing group. One shoot of ore has, in fact, been opened up on the Worthing daims and shows values aggregating \$60 per ton, the ore being admirable for fluxing, and, in consequence, much in demand at the smelters.

This shoot has been sunk on for a distance of thirty feet, and there is also a secventy-foot tunnel on the property which is being sent in to tap the ore at a depth of 160 feet. Work on the continuation of this tunnel will be started at once, and it is expected that within the next sixty days the ore will be tapped.

Messrs. Slean and Smith will incorporate a company for the further development of their holdings and will get into line with the numerous other operators who are demonstrating their faith in the Ophir country by prosecuting work on their various holdings.

UTAH COALITION ORE HOLDING OUT

Expected in Near Future.

Reports from the property of the Utah Mines Coalition company, near Alta are to the effect that the strike of highgrade ore made during the holidays is widening out in good shape, and that indications are stronger than ever that the find will develop into a large deposit of the first-class product. Though Manager adjustickland has been unable to go to the sive mine of late on account of illness in his family, he has kept in close touch with operations at the property, and he is satisfled that developments are proving up to the most sanguine expectations.

The ore has been followed now, it is

The ore has been followed now, it is stated for a distance of seventy-five feet, and the streak increases in width and values as work progresses. Mr. Strickland says that, according to original calculations the main ore body, toward which work is being prosecuted, is located about 150 feet further on from the point where the recent discovery was made, so that there is still seventy-five or eighty feet to drive before the objective point is reached. All indications as the work goes on tend to substantiate the original predictions of the management, and local interests are confident that the big ore bodies will be opened up as anticipated in due time.

Roads Open.

Roads Open. Roads Open.

Mr. Strickland states that at no time during the present winter has it been impossible or even more than ordinarily difficult to get supplies and provisions to the mine. The roads are open and in good shape all the way up Big Cottonwood, and teams are going and coming regularly from the Conlition and other mines in the district. Contrary to popular belief, the Cottonwood and Alta country is not perpetually snowbound during the winter months, and when there is as much traffic as there has been for the past two or three seasons there is no difficulty experienced in keeping the roads open.

there is no difficulty experienced in keeping the roads open.

In the early days of the district, when
but a few men were working in the
district, it was not uncommon for them
to become isolated during the winter
months, and skees were a favorite mode
of travel, but of late years increased
activity in the mining industry up that
way has served to keep the country well
opened all the year around.

Mining Notes.

The annual meeting of the members of the Salt Lake Mining and Stock exchange will be held at the Exchange building Saturday afternoon at 1 o clock. At that time nine directors will be elected, to serve for the ensuing year, and such other business as may legally come serve for the role of the construction of the Wabuska-Construction of M. J. Dailey, assistant manager of the Sliver King Coalition property at Park Gity, was a visitor in Salt Lake Thursday.

Peter Cass, who is in charge of the development work on the Thor group of claims in Park City, is visiting in this city on business. Mr. Cass states that yery astisfactory results are attention.

city on business. Mr. Cass states that very satisfactory results are attending the development of the Thor property. Thomas Watson, who is heavily inter-ested in the Star group of claims in the Park City district, is visiting in Salt Lake on business. Mr. Watson is also interested now in some promising pros-pects in Ogden canyon, work on which has been discontinued until summer. Manager Tony Jacobson was scheduled to return Thursday evening from a visit of inspection at the mine.

A Traveling Salesman.

H. F. Beers, 617 7th Ave., Peoria, Ill. writes: "I have been troubled for some time with kidney trouble, so severely at times I could scarcely carry my grips. After using one bottle of Foley's Kidney Pills I have been entirely relieved. and cheerfully recommend them to all." Foley's Kidney Pills are healing and antiseptic and will restore health and strength. Schramm-Johnson Co.

MILFORD DISTRICTS HAVE MUCH PROMISE

Breaker for Development Work.

Judge Forgle of Milford, Utah, is in the city for a few days' visit, attending to mining and other business interests Mr. Forgie states that the new year has started off in a manner which indicates a progressive and prosperous season for the properties in the mining district adjacent to Milford. The recent extensive ore development in the Red Warrior property, he states, is fully as important as it has been reported, and W. J. Merritt, who has charge of the work at the Warrior, now has a force of men employed in the further development of the Warrior, now has a force of men chiployed in the further development of the old Cave group of claims, the Cave property in years gone by having been a big producer of profitable ores. In the palmy days of its operation the property was owned by Henry Lawrence, S. W. Godbe and other Salt Lake mining men, and Mr. Merritt is confident that the mine has by no means been exhausted of its paying product, and that he will be able to again put it on a shipping basis.

Mr. Forgie states that the Commonwealth property is piling up a big tonnage of ore for future shipment, and that an addition to the operating force will be made as soon as the warm weather comes. At the Saint Mary group, also, work is being carried, on by a company promoted by Pat Ryan and Duluth and St. Paul capitalists, and Mr. Forgie states that a new find of silver-lead ore has recently been made in the progress of this development. Samples of the ore are being assayed at the present time.

and if it comes up to expectation product will make production pro-Other Properties Active.

Other Properties Active.

The Hub group of claims, owned by Boston people, is being developed under the perzonal supervision of Mr. Birchard, and is shipping silver, lead and copper ores quite regularly.

The old Nellie claims, which are credited with the production of more than \$600,000 worth of ore in the early days, have recently developed into quite a copper proposition, the vein showing a width of sixty feet on the surface. The ore is sulphide in character and carries with it enough iron to make an admrhable product for smelting. The copper possibilities of the claims will, accordingly, be further developed, and Mr. Forgle is of the opinion that during the year the Nellie will become a property of importance.

The Moscow, Codar-Tallegman and Pre-

The Moscow, Cedar-Talisman and Pro-gressive companies are also doing ex-tensive work and getting satisfactory re-

Catarrh, an excessive secretion from an inflamed mucous membrane is radically and permanently cured by Hood's Sarsaparilla.
